

AI Prompts - CITS4407 Assignment 2

Name: Aakarsh Sagar Mahajan

Student Number: 25152118

Date: 22 May 2026

1. What is difference between `2>&1` and `just>` in bash?
2. How to use of `grep -F`? Give example?
3. How do i print NF for just the header row?
4. In awk how do i split a field on the letter T to get just the date part? like 2009-09-18T15:36:33.000Z should become 2009-09-18. i know about `split()` but not sure of the syntax
5. I want to remove duplicate lines from awk output.
6. My if statement in bash is giving me a syntax error, but the condition looks right to me.
7. how do i use sed to delete the first line of a file before piping it to awk? Is it sed '1d'?
8. in awk i want to keep track of how many times each `video_id` appears.
9. i am adding up views with `total += $3` and counting rows, then in END i want to do total/count and print it to 2 decimal places using `printf`?
10. it best to just use an if statement comparing to a stored max variable when track the maximum value of a column in awk across all rows.
11. What does NR NF mean in awk I keep mixing them up.
12. Difference between `print` and `printf` in awk?
13. Can you write a bash test script for my clean script covering all the error cases and data cleaning cases?
14. how do i use `grep -c` to count how many lines in a string match a pattern? i want to check that a certain line appears exactly once in the output
15. Awk is treating my number fields as strings. I think the comparisons are not working correctly.
16. My awk script runs but prints nothing, no error, no output – just blank.
17. How do I create new branch in git and switch to it at the same time?
18. can you check if my README.md covers all the required parts — it needs to explain how to run clean and analyse, what errors they check for, and what the expected output looks like
19. Can you write a bash test script for my clean script covering all the error cases, ties, edge cases like zero views and negative sentiment, and precision of mean views?
20. How do I merge my branch into main after I am done with it?
